Wisconsin Chapter Welcomes

ABB Inc

NECA Premier Partner and Affiliate Member

As a national partner of NECA, ABB would like to share updates to the NECA, Wisconsin Chapter regarding the company's electrification business.

As of July 1st, 2018, GE Industrial Solutions joined forces with ABB as part of the company's Electrification Business, earning the number two share position in electrification globally. For those unfamiliar, the ABB Electrification business offers a wide-ranging portfolio of products, digital solutions and services, from substation to socket, enabling safe, smart and sustainable electrification.

Industrial Solutions is known in the market to provide an array of LV & MV electrical solutions from grid to chip. This acquisition is a huge milestone for both Organizations which now include 56,000 employees and 100+ manufacturing factories globally. Since July 1st, 2018, ABB invested over \$100MM+ in the Industrial Solutions business to encompass manufacturing upgrades, product investment and hiring 100 commercial/sales resources to better support the US market. In 2020, the business will be merging the best of portfolios to marry ABB's superior products (breakers, drives, MV) with the greatest of GE's LV solutions (switchboards, panels, MCC's, etc.), to introduce 100 new product introductions in the market. We urge NECA readers to check out <https://electrification.us.abb.com/bestofboth> to understand the full story how our two worlds are evolving rapidly. Speaking of new products, ABB's newest Reliagear neXT Power Panel launched this January, blending ABB + GE technology. Learn more here: <https://new.abb.com/low-voltage/launches/reliagear-next>

The business has the humble ambition to double our share over the next 10 years within the US. ABB's newly developed Wisconsin Team is passionate to ensure an outstanding customer experience. We ask the NECA community to provide ABB the opportunity to delight your organizations. Should you have any questions, please do not hesitate to reach out to local ABB Wisconsin Commercial Construction & Industrial Sales leader, Christina Campbell – Christina.Campbell@us.abb.com.

The National Electrical Code (NEC) is the most widely used electrical standard in the United States. As new technologies, equipment, wiring methods and industry needs evolve, the NEC must stay current to effectively address essential installation and safety requirements.

This course covers 2017 NEC changes for license holders in Montana, Oregon, Utah, Washington, **Wisconsin**, and Wyoming.
